11. **AFTER-CARE & WARRANTY**

Reassurance about support, servicing, and protection after the build is complete.

WHO CHOOSES A GRANNY ANNEXE - AND WHY?

Our annexes are chosen by families at moments of change - when living arrangements need to adapt, but independence, dignity, and quality of life still matter.

OLDER PARENTS MOVING CLOSER TO FAMILY

One of the most common reasons families invest in a granny annexe is to bring older parents closer to their adult children. This might be so grandparents can be more involved with grandchildren, offering day-to-day support, school pickups, or simply being part of family life again. Equally, it can be because parents themselves are beginning to need support — reassurance, proximity, and peace of mind - without losing their independence.

A granny annexe allows families to be close, but not on top of each other. Everyone has their own front door, their own space, and their own routine.

SUPPORT WITHOUT COMPROMISE

As needs change, a thoughtfully designed annexe can offer step-free access, wider doorways, accessible bathrooms, and layouts that future-proof the home — all without feeling clinical or institutional. It's a way to provide care and support while preserving privacy, pride, and autonomy.

FLEXIBLE SPACE FOR MODERN LIVING

Many families choose an annexe not just for today, but for the flexibility it offers tomorrow. It can be used as:

Comfortable accommodation for visiting friends and family

- A private guest suite
- A home office or studio
- Space for adult children returning home
- A future-proof solution as family needs evolve

What starts as guest accommodation can later become a permanent home for a loved one or vice versa.

KEEPING FAMILIES CONNECTED

An annexe supports multigenerational living in a way that feels natural and balanced. It keeps families connected without forcing difficult compromises or rushed decisions. There's comfort in knowing loved ones are nearby, and freedom in knowing everyone still has their own space.

A LONG-TERM INVESTMENT

Beyond lifestyle benefits, a granny annexe is also a practical investment. It adds valuable living space, increases property flexibility, and adapts as life changes often avoiding the emotional and financial costs of moving, downsizing, or residential care.

WHY CHOOSE THE GRANNY ANNEXE COMPANY

Choosing the right **annexe Company** is an important decision. It isn't just about construction it's about comfort, safety, independence, and the peace of mind that comes from knowing a loved one has a home they can truly enjoy. At **The Granny Annexe Company**, we understand this deeply, because our business was built around those values.

Our director, **Matt Biddle**, has spent many years designing and building annexes across the UK. After seeing the wide variation in build quality, Matt knew there was a better way one that placed care, craftsmanship, and long-term comfort at the heart of every project.

Matt founded The Granny Annexe Company with a simple belief:
An annexe should never feel temporary. It should feel like a proper home if not even better.

Instead of the lightweight structures common in the industry, Matt set out to create annexes that outperform modern new-build homes in strength, warmth, and energy efficiency. Homes built with the same attention to detail you'd expect in a premium bungalow solid, quiet, durable, and comfortable all year round.

This commitment to quality can be seen in everything we do:

- **Steel-frame construction** for unmatched strength and longevity
- **High insulation levels** to keep running costs low
- **Bespoke designs** giving you the option to determine the exact specification
- **Finishes that feel permanent, refined, and welcoming**

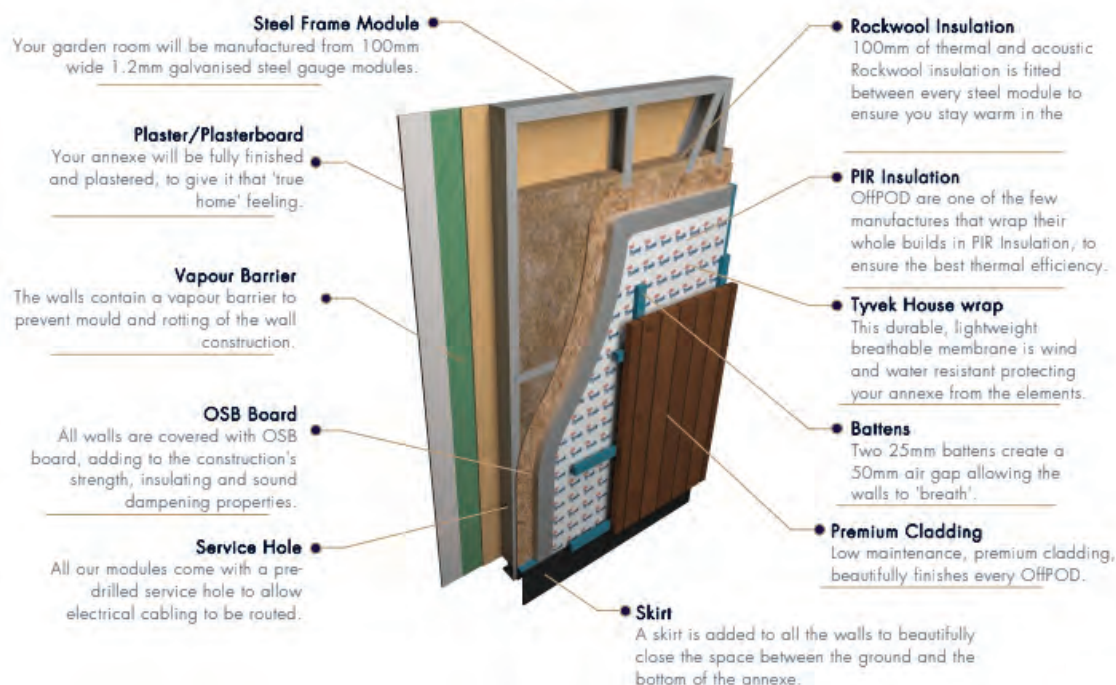

Just as important is the experience. Matt believes creating an annexe should be enjoyable, not stressful. That's why we handle everything from planning and design to construction and handover keeping you informed at every stage.

Families choose The Granny Annexe Company because they want more than an extra building in the garden.

They want a **home built with care**. By a company they can **trust**.

Below details the wall construction that will be used to manufacture your luxury Annexe.

WHAT IS A GRANNY ANNEXE?

A **granny annexe** is a self-contained home built in the garden of an existing property, offering a safe and comfortable living space for a loved one while keeping them close to family support. It includes everything needed for independent day-to-day living such as a bedroom, bathroom, kitchen, and living area, all designed with comfort, privacy, and accessibility in mind.

For many families, an annexe is the ideal balance between independence and reassurance. It allows older relatives to enjoy their own home, their own routine, and their own front door, while being just a few steps away if help is ever needed. This makes annexes a popular, practical alternative to care homes or distant accommodation.

BUILT UNDER THE CARAVAN ACT FOR A SMOOTHER PLANNING JOURNEY

Most of our homes are built under the Caravan Act, also known as the Caravan Sites Act. This framework allows a fully equipped annexe to be classed as a “mobile structure,” which can often make the planning process far simpler and more predictable than applying for a traditional building

Despite the legal classification, our annexes perform as high-quality homes – not temporary cabins or lightweight units.

BUILT BEYOND BS 3632 RESIDENTIAL STANDARDS

Our annexes are constructed to exceed BS 3632, the UK’s residential park home standard.

BS 3632 homes must meet strict requirements for: Thermal efficiency, Sound insulation, ventilation and moisture control, Durability and year-round comfort.

We build beyond these requirements, ensuring every annexe is warmer, stronger, and more comfortable than the standard demands. In fact, our construction quality goes further still.

We design our annexes to outperform modern new-build houses, with higher insulation values, exceptional airtightness, and steel frames that provide long-term structural stability.

The result is a home that feels solid, quiet, and exceptionally warm – a place built for real living, not just for meeting minimum requirements.

WHY CHOOSE A STEEL-FRAME GRANNY ANNEXE?

A steel-frame annexe offers strength, safety, and long-term peace of mind. All essential when building a home for an older loved one.

STRONGER & SAFER

Steel will not warp, rot, or twist, and it's naturally fire-resistant. This creates a solid, secure home that stays reliable for decades.

WARM, EFFICIENT & COMFORTABLE

With high-spec insulation and airtight construction, steel-frame homes stay warm in winter, cool in summer, and economical to run all year round.

QUIET & STABLE

Steel minimises movement, helping the annexe feel calm, solid, and bungalow-like inside.

PREFABRICATED FOR FASTER ON-SITE BUILD

Our steel frames are precision-manufactured off site, ensuring consistent quality and allowing us to complete the on-site build quickly, cleanly, and with minimal disruption.

WHY CHOOSE A STEEL-FRAME GRANNY ANNEXE?

When comparing annexes, the differences in build quality can be significant. Many look similar from the outside, but the materials, insulation, and construction methods used can dramatically affect comfort, running costs, and how long the annexe will last.

At **The Granny Annexe Company**, we believe a garden annexe should be built to the same standard as a high-quality home - not a temporary structure. That's why we go far beyond the basic requirements used by many other builders.

BUILT TO EXCEED NEW-BUILD HOME STANDARDS

In the UK, new-build houses must meet strict Building Regulations for thermal performance (known as U-values). These set maximum limits for how much heat can escape through walls, floors, roofs, windows, and doors.

Typical Building Regulation requirements:

- **Walls:** around 0.26 W/m²K
- **Roofs:** around 0.16 W/m²K
- **Floors:** around 0.18 W/m²K
- **Windows:** around 1.4 W/m²K

Our annexes are engineered to outperform these figures:

- **Walls:** approx. 0.23 W/m²K
- **Roofs:** approx. 0.14 W/m²K
- **Floors:** approx. 0.15 W/m²K
- **Triple-glazed windows:** approx. 0.9–1.0 W/m²K

This means our homes keep heat in more effectively than most newly built houses resulting in a warmer, quieter, more efficient annexe.

PREMIUM INSULATION IN EVERY ANNEXE

We combine multiple layers of high-performance insulation to create year-round comfort:

- **Acoustic Rockwool** in all walls and floors for exceptional soundproofing and a calm, quiet interior.
- **High-performance PIR** insulation for excellent thermal efficiency.
- **Triple-glazed windows** as standard - something rarely offered even in many new-build houses.

Together, these materials create a warm, peaceful, and energy-efficient living environment that stands the test of time.

LONG-TERM COMFORT, NOT SHORT-TERM SAVINGS

Some annexes on the market are built using lightweight materials, limited insulation, or single/double glazing. These may look appealing at first but can feel colder in winter, hotter in summer, and less solid over time.

HOW MUCH WILL A GRANNY ANNEXE COST?

Every family's needs are different, and every garden is unique - which is why we can build your annexe in almost any size or layout. The examples shown in the table on this page are simply to give you a clear idea of typical sizes and guide pricing.

The final cost of your annexe will depend on factors such as:

- The size and layout of your annexe
- Optional upgrades and personalised finishes
- Ground conditions and service connections

What we always guarantee is clear, upfront pricing with no surprises. Once we've discussed your needs and assessed your garden, we provide a full written quotation so you can budget with complete confidence.

PRICING EXAMPLES

Size	Price	Footprint
4m x 5.5m	£59,995	22 sqm
4m x 7m	£68,350	28 sqm
4m x 9m	£81,000	36 sqm
5m x 10m	£93,000	50 sqm
5m x 12m	£107,350	60 sqm
5m x 15m	£130,375	75 sqm
5m x 19m	£145,725	95 sqm

WE TAKE CARE OF EVERYTHING

Building a granny annexe should feel exciting, not overwhelming. That's why we offer a complete, start-to-finish service, handling every stage of the project so you don't have to worry about a thing.

From the moment you choose your design, we manage:

- All planning applications and approvals
- Full drawings and technical design
- Demolition of existing outbuildings, if required
- Groundworks, foundations, and service connections
- Construction of your annexe, fully finished inside and out
- Electrical, plumbing, heating, kitchen, and bathroom installation
- Final checks, certification, and handover

When your annexe is complete, the only thing left for you to do is move in your furniture and start enjoying your new home.

The only area we do not cover is garden landscaping, as this is often personal to each family. But everything relating to the annexe itself, from preparation to completion, is taken care of by our team.

With The Granny Annexe Company, "full service" truly means everything is handled for you, smoothly and professionally, from day one to move-in day.

WHAT'S INCLUDED AS STANDARD

Every annexe we build comes fully finished and ready to furnish, with all the essential features already included - no hidden extras and no unexpected costs. We take pride in delivering a home that feels complete, comfortable, and welcoming from the moment you step inside.

HIGH-QUALITY FLOORING THROUGHOUT

Durable, easy-to-clean flooring in a choice of modern finishes.

COMPLETE ELECTRICAL PACKAGE

Ceiling lights & plug sockets in every room, plus extractor fans in bathrooms.

FULLY DECORATED INTERIOR

Smooth plastered walls, painted white.

MODERN ELECTRIC RADIATORS

Energy-efficient heating in every room for reliable, year-round warmth.

MATCHING SKIRTING BOARDS AND INTERNAL DOORS

A polished, homely finish that feels like a high-quality bungalow.

TRIPLE-GLAZED WINDOWS AND DOORS

Superior warmth, comfort, and sound reduction - included as standard.

YOUR KITCHEN & **SHOWER ROOM**

A full kitchen allowance

Covers modern units, worktops, and essential appliances, with options to personalise.

A fully equipped shower room, including:

Walk-in shower

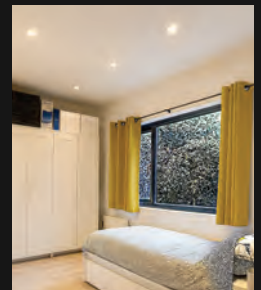

Toilet and basin

Splashproof wall panels

Heated towel rail

LED lighting and extraction

WHAT'S INCLUDED **OUTSIDE THE ANNEXE**

Ground preparation works*

We prepare the area where the annexe will sit, ensuring a suitable and level base.

Service connections*

We connect your annexe to the main house for water, electricity, and waste - removing the need for multiple contractors.

PLANNING & **PROTECTION**

Lawful Development Certificate (LDC)

We handle the full application to provide formal confirmation that your annexe is legally compliant under the Caravan Act.

10-year structural warranty

Every annexe is protected for a full decade, giving you long-term peace of mind.

OPTIONAL EXTRAS & PERSONAL CHOICES

Ways to tailor your annexe for comfort, accessibility, and personal style.

When you choose **The Granny Annexe Company** you are able personalise the space to suit your lifestyle now and in the future. From enhanced comfort features to accessibility-focused adaptations, our optional extras are unlimited to ensure your annexe works perfectly for its intended use.

Design & Exterior Options

- Pitched roof designs
- Choice of external cladding finishes
- Integrated canopies and overhangs
- Bespoke window and door configurations

Doors, Windows & Natural Light

- Bifold or sliding patio doors
- Floor-to-ceiling glazing
- Enhanced thermal and acoustic glazing

Comfort & Energy Efficiency

- Underfloor heating systems
- High-performance insulation upgrades
- Smart heating and lighting controls
- Mechanical ventilation with heat recovery (MVHR)

Accessibility & Mobility

- Step-free access and external ramps
- Wider corridors and door openings
- Level-access showers and wet rooms
- Reinforced walls for future grab rails

Bathroom & Living Enhancements

- Fully fitted wet rooms or baths
- Slip-resistant flooring options
- Integrated seating and storage solutions
- Custom kitchenettes and utility spaces

Future-Proofing Your Annexe

- Adaptable layouts for changing needs
- Technology-ready infrastructure

Our team will guide you through every option, ensuring your annexe is not only beautifully designed but practical, accessible, and built to support long-term comfort and independence.

A FEW EXAMPLES OF OUR COMPLETED PROJECTS

A look at real annexes, designs, layouts, and finishes.

BUILD EXAMPLES 01

9.0m x 5.0m x 3.1m Garden Annexe

This bespoke Garden Annexe was designed to provide a safe, comfortable, and independent living space for a family member with a degenerative condition, while remaining close to loved ones for daily support and care.

The annexe offers a bright open-plan living area, bedroom, and fully fitted wet room, with generous glazing and a roof lantern creating a calm, light-filled environment. High levels of insulation, efficient heating, and a carefully considered layout for hoist usage and to ensure long-term comfort and ease of use.

Delivered as a complete turnkey solution, the annexe balances thoughtful design with robust construction, allowing our client to live independently with confidence.

Key Specification & Inclusions

- Approx. internal dimensions: 8,450mm x 4,450mm (max internal height 2,400mm)
- Ground screw foundations
- 350mm roof overhang with steel fascias
- 300mm composite cladding (front, left & right elevations)
- Steel panel rear elevation
- EPDM flat roof system
- 2.2m uPVC anthracite French doors with side panels (x2)
- Anthracite uPVC windows (including frosted wet room window)
- 2,000mm x 1,500mm roof lantern
- Plastered finish
- Decorating
- Fitted kitchen

- Dimmer switches
- External socket
- Water heater
- Drain survey included
- Internal sliding door
- Laminate flooring throughout
- Smart panel electric heaters
- Supply & waste connections
- CAT 6 data connection
- External PIR security light
- PIR insulation throughout
- 10-year structural warranty
- Brushed steel sockets throughout
- Certified hard-wired electrical connection
- LED downlights internally and externally
- High-definition 3D professional renders
- Fully fitted wet room (toilet, shower, sink & aqua panels)

Total Price:

£93,456

BUILD EXAMPLES 02

9.8m x 3.5m x 3.1m

This bespoke Garden Annexe was designed to create a high-quality, self-contained living space for a family member requiring independence while remaining close to the main home. The brief focused on comfort, privacy, and a layout suitable for long-term everyday living.

The annexe provides a bright open-plan living and kitchen space, a separate bedroom area, and a fully fitted shower room. Large windows and glazed doors allow natural light to flow throughout, while high levels of insulation and efficient electric heating ensure year-round comfort.

Delivered as a fully turnkey solution, this annexe offers a practical and well-balanced living environment - ideal for extended family use, future-proofing the home, or flexible multi-generational living.

Key Specification & Inclusions

- Approx. internal dimensions: 9,300mm x 3,000mm (max internal height 2,400mm)
- Ground screw foundations
- 350mm roof overhang with steel fascias
- Composite Cladding
- Insulated steel roof system
- Black square guttering to the rear
- 1.5m grey uPVC French door (front elevation)
- Anthracite uPVC A+ rated windows
- Plasterboard walls with plastered finish
- Internally painted white
- Laminate flooring throughout
- Fully fitted shower room (toilet, shower, sink & tiled floor)
- 8-unit fitted kitchen (extractor, sink, hob & oven)
- Smart panel electric heaters
- Certified hard-wired electrical connection
- CAT 6 data connection

- Brushed steel double plug sockets
- Internal centre lighting
- External lighting
- Water heater
- Supply & waste connections up to 20m
- 2 x internal pocket doors
- Edge MDF skirting boards
- Insulated to the same standard as a new-build house
- High-definition 3D professional renders
- Delivery and full installation included
- 10-year structural warranty

Total Price:
£74,200

BUILD EXAMPLES 03

3.8m x 7.8m x 2.8m

This bespoke Luxury Garden Annexe was designed as a compact, self-contained living space for a family member visiting from Hong Kong for extended periods, providing independence while remaining closely connected to the main home.

Carefully planned to maximise space and comfort, the annexe includes an open-plan living area, sleeping space, and a fully fitted shower room. High levels of insulation, efficient heating, and a simple, functional layout ensure a comfortable stay throughout the year.

Delivered as a turnkey solution, this annexe offers a practical and welcoming home-from-home, allowing visiting family members to enjoy privacy, comfort, and independence during longer visits.

Key Specification & Inclusions

- Approx. internal dimensions: 3,200mm x 7,200mm (max height 2,445mm)
- Ground screw foundations
- 350mm roof overhang with steel fascias
- Composite cladding to front elevation
- Insulated steel roof system
- Black square guttering
- 2.0m uPVC French door
- Anthracite uPVC window
- Bathroom ventilation window
- Plasterboard walls
- Decorated finish
- Laminate flooring throughout
- Fully fitted shower room (toilet, shower, sink & aqua panels)
- Pocket oak-style sliding door
- Smart panel electric heaters (x2)

- Certified hard-wired electrical connection
- Brushed steel double plug sockets (x6)
- Internal LED lighting
- External LED up/down lights
- Water heater
- Edge MDF skirting boards
- Groundworks, waste pump & installation included
- 10-year structural warranty

Total Price:
£66,370

BUILD EXAMPLES 04

15.5m x 6.0m x 3.4m

This large two bedroom Annexe was designed as a high-quality home, offering comfortable and practical living with a strong focus on longevity, efficiency, and low maintenance. The brief was to create a modern annexe for a clients parents that could adapt easily to future needs while remaining simple and robust in its design.

The layout provides generous, well-proportioned internal spaces with large aluminium glazing to maximise natural light. High levels of insulation, durable external finishes, and carefully selected materials ensure the Annexe performs to modern building standards while maintaining a clean, contemporary appearance.

Delivered as a complete turnkey build, the project includes full groundworks, structure, services, and commissioning, providing a straightforward and dependable route to a new home.

Key Specification & Inclusions

- Steel fascias
- EPDM flat roof system
- Black square guttering
- Brick slip perimeter skirt
- K-Render external finish (rear)
- Larch Cladding
- 5.0m anthracite aluminium door
- Composite entrance door with side glazing
- Fixed full-height aluminium windows (anthracite)
- Top-hinged aluminium windows (anthracite)
- Triple-pane single-hinged aluminium windows
- Plasterboard walls with plastered finish
- Internal oak-style doors
- Engineered Wooden Flooring

- Certified hard-wired electrical connection
- Brushed Steel Plug Sockets
- Smart Panel Heaters
- Internal LED lighting
- First-fix plumbing
- Fitted kitchen
- Two fitted shower rooms
- Removal of all waste during build
- On-site welfare facilities
- Planning application
- 10-year structural warranty

Total Price:
£153,000

AFTERCARE AND WARRANTY

Your peace of mind doesn't end when we hand over the keys. Every annexe we build comes with comprehensive protection and clear aftercare so you can enjoy your new home with complete confidence.

10-YEAR STRUCTURAL WARRANTY

The main structure of your annexe is covered by a full 10-year structural warranty, giving long-term reassurance that your home has been built to last. This covers the core elements of the building — the parts that matter most for safety, durability, and long-term performance.

INDIVIDUAL MANUFACTURER WARRANTIES

Alongside the structural warranty, many components within your annexe come with their own **manufacturer-backed guarantees**, such as:

- Kitchen appliances (e.g., cooker, hob, extractor)
- Heating systems and radiators
- Windows and doors
- Electrical fittings
- Bathroom fixtures

These warranties vary by product and brand, offering reliable coverage should anything need attention in the future.

COMPLETE WARRANTY PACK PROVIDED

To make everything simple and transparent, we supply a detailed **Warranty & Aftercare Document** with every build. This includes:

- Full breakdown of what's covered
- All manufacturer warranty certificates
- Maintenance guidance for long-term performance
- Contact details for support or queries

We believe every client should know exactly what protection they have — with no hidden gaps or unclear small print.
